

World's Largest Manufacturer of Aftermarket Gel-Coat

Super Gloss-Kote

Super Gloss-Kote / Order #888

Super Gloss is a high grade ISO NPG product. This product is to aid in the reduction of labor cost for large repair areas to create a high gloss finish with a minimum amount of sanding and buffing. Gelcoat does not require any reducer or wax additive. Just add the correct amount of M.E.K.P. and spray for paint like finishes.

Piranha-Kote / Order #799

Piranha-Kote is the highest-grade gelcoat available from Mini-Craft. This product is designed for extensive weather exposures and incorporates chemicals for improved blister resistance, gloss retention and crack preventions.

For all your Gel-Kote and Fiberglass needs,

Platinum Kote

Platinum-Kote / Order #788

Platinum-Kote brand gelcoat is a high grade ISO-NPGR product. Includes a number of other chemicals improving blister resistance along with high gloss retention.

Premium-Kote / Order #766

Premium-Kote gelcoat is an ISO-NPGR product. Incorporating less NPGR when compared to our Piranha and Platinum-Kote product lines, McKote Premium gelcoat is designed to give high resistance to water and chalking. Premium gelcoat can be sprayed through either a pressure pot or airless.

2009 Mini-Craft University Hands-On Professional Workshops

Workshop 1

Polyflake Repair

2 Day Course

Repair Stress Cracks & Scrapes

Learn the preparation procedures to achieve level repair

Application of Flakes

Learn both wet and dry flake application techniques.

Clean Gel-Coat Application Techniques

Learn how to eliminate "hazy buildup" and reduce water sanding time.

Workshop 2

Cosmetic Gel-Coat Repair & Color Tinting

2 Day Course

Color Matching

Learn the newest techniques in color matching.

Gel-Coat

Each student will work on a fiberglass boat section to repair air voids, stress cracks and scrapes/nicks, etc.

Gel-Coat Refurbishing

Learn the latest products for rejuvenating dull, faded Gel-Coat.

Workshop 3

Mold Making

3 Day Course

Plug Design and Construction

Build a wood plug and prepare plug for the molding process.

Mold Construction

Build mold from plug and prepare for production.

Workshop 4

General Fiberglass Fabrications

2 Day Course

Lay Up Scheduling

Learn how to develop a lay up schedule for your production needs.

Implement Lay Up Schedule

Learn the most efficient and cost effective method to fabricate a fiberglass mold or part.

Workshop 5

General Fiberglass Repair

2 Day Course

Punctures & Fractures

Learn the latest in coring materials to strengthen damaged areas.

"Lay-Up" Procedures

Learn the "lay-up" schedule to ensure stiffness and longevity.

Workshop 6

Heavy-Duty Fiberglass Repair

2 Day Course

Floor and Deck

Replace wet and rotten core with new materials.

Transom and Stringers

Learn to replace transoms and stringers w/the latest compounds & fiberglass.

Workshop 7

Non-Skid Flex-Mold Repair

2 Day Course

Flex-Mold

Learn to install Flex-Mold on a plug before making the mold.

Learn how to prepare Flex-Mold Non-Skid surfaces before starting the repair.

Learn to repair Flex-Mold Non-Skid patterns on any fiberglass surface.

Daily Schedule - All Classes

8:30 a.m.	Class begins
10:15-10:30 a.m.	Break
12:30-1:00 p.m.	Lunch
3:15-3:30 p.m.	Break
5:00 p.m.	End of Day

* All classes will be subject to a 25% cancellation fee.

Workshop Instructor ~ Paul LaCharite ~

Paul has been manufacturing Gel-Coat since 1976. He has also been involved with the application of Gel-Coat at both the OEM and repair yard level since that time. In 1980, Paul became involved with the Mini-Craft of Florida Gel-Coat Division/quick Tint System, mastering the process of matching and adjusting colors. This process is completed in minutes, thereby shortening repair time. Shorter repair time equals higher profits for you! These techniques will be shared with you in the hands-on workshops.

Here's what your colleagues are saying about the workshops

"Very informative, enjoyed the hands-on versus a sit down class. I felt it was worth every penny."

- Oren Beach, East Coast Marine
Rye, NY

"The best class I have ever attended, very thorough, understand Gel-Coat better now than ever before."

- Miles Bliss, Rochester Yacht Club
Rochester, NY

"The class was great. I learned more in two days training than I have in two years in the field."

- Brian Reese, Atlantic Yacht Sales
Middletown, NJ

All class schedules run between the month of October through the end of March. Please call for the course you are interested in and the date of interest for availability.
