**(A variety of sizes are available upon request)**

Impervicote, a company that is known for our patented & innovative seamless countertops, is now offering the same features in table tops. Our table tops are made from 30% recycled steel, and 100% recyclable in the future, giving us a very high sustainability rating. In addition our manufacturing facility uses no solvents, nor does it emit any odors, vapors, or fumes during or after the manufacturing of our products. They are heat resistant, scratch resistant, and non-porous. Being non-porous, they do not stain and do not absorb bacteria. They can be used both indoors and out. We have several basic colors in our standard price sheet, two premium colors, with custom colors available at additional cost. Impervicote has the unique ability to be applied over existing table tops for a quick and inexpensive upgrade. They are also available with subdeck pre-mounted to use with your table bases.
