

# Security Tool Box WSB

Security Tool Box can be used on trucks, transporters, trailers and utility vehicles. They serve as a safe storage place for personal tools, small appliances and general equipment. The high level of theft, weather and material protection as well as the easy loading are major features of this product – the inconvenient loading and unloading of the vehicle is not necessary and set-up costs are reduced.

- Safe keeping place for valuable tools and appliances
- WSB can be attached to the vehicle
- Security with 2 discus locks
- Gas struts prevent closing of the lid
- Transport of the box:
  - **manual** (4 handles)
  - **forklift** (forklift pockets, also for ventilation)
  - **crane** (4 jack rings with load up to 550 lbs/ 250 kg)
- High level of operational safety with TÜV certification and GS mark

### Delivery:
