

BEAUTY ALL YEAR

When the homeowners told **Peter Grunow** of Gro Pro Landscaping they wanted a Tuscan feel to their waterfront home, he turned to evergreens, boxwoods, hornbeams and climbing vines. They

give it an Old World feel and supply beauty even through winter. Formal flowering shrubs and perennials add color. At the pool, the focus is on flowering trees and perennials that take turns blooming through swimming season. A hedge of espaliered apple and pear

trees give the pool area structure and intimacy. A whimsical apple sculpture is made out of the extra slate from the home's roof. Grunow says evergreens are key to a formal backdrop for any landscape. Pair them with flowering shrubs and colorful perennials.
