

# **Minimize your risk with Challenging Glazing applications...**

## **Heat soak test your fully tempered glass.**

Heat soak testing may help to reduce the probability of spontaneous breakage due to nickel sulfide inclusions and other imperfections that may exist in fully tempered glass.

Rapid expansion of nickel sulfide can break the glass.

JEB offers 100% heat soak testing for 1/4" through 3/4" uncoated or pyrolytic low-e glass that is typically used in demanding or higher risk glazing applications.

- Structural Glass Walls
- Handrails
- Doors
- Insulating Glass
- Canopies
- Overhead Glazing
- Laminated Glass

Processed in compliance with European Standards EN 14179-1:2005.

ARCHITECTURAL GLASS SINCE 1920

## TECHNICAL SUPPORT

- Glass Performance Data
- LBNL Windows 5.2, Optics 5
- Thermal Stress Analysis
- Glass Deflection
- Submittal Samples
- Architectural Binders
- EZ Specification Change Program
- Architectural Presentations
- LEED® Documentation & Sustainable Project Assistance

## PRODUCTS

- Tempering
  - 1/4"
  - 3/8"
  - 1/2"
  - 3/4"
  - 5/8" (consult factory)

- Insulating
  - Black & Gray Sealants

- Spandrel
  - 8 Standard Colors
- Silk Screening
  - 1/8" Dots & Lines
  - Custom Patterns Available

- Point-Supported Wall Systems
  - Monolithic
  - Insulated Glass

- Canopies
- All Glass Entrances
  - Swing
  - Sliding
  - Stacking

- Project & LEED Assistance
- CNC Fabrication
