Sometimes the Simplest Ideas Can Change Your Life!

Is anything more wonderful than the simple pleasure of taking a warm bath in the comfort of your own home? The cares of the day seem to fade away, along with the aches and pains of everyday life. The fear of falling has made the luxury of bathing, and it's therapeutic benefits, a thing of the past... until now. Safe Bathtub Inc, a leader in developing products designed for seniors, has created a **NON-AC POWERED BATH CHAIR LIFT** that offers more than just safe bathing...It offers **peace of mind** and **'stay-at-home' independence**.

Safe Bathtub's PRO Bath Chair Lift takes advantage of **your existing bathtub**, saving you thousands of dollars in costly remodeling expenses. Mounted beside your tub, THE PRO® provides a chair lift system that raises you over the front wall of your tub with the simple push of a button. The chair automatically rotates, allowing you to lower yourself to the bottom of the tub for a warm, soothing bath. When finished you simply press the up button and return to your original starting position, outside of the tub. The pleasure of a relaxing warm bath is as close as your telephone!
