COLOR CONTRAST

Here are 18 color combinations tested for visibility at various distances by the OAAA.

Visibility is ranked in the sequence shown, with "1" the most visible and "18" the least visible.

READABILITY

It is essential that outdoor designs are easy to read. Choose colors with high contrast in both hue and value. Contrasting colors are viewed well from great distances, while colors with low contrast will blend together and obscure a message. In fact, research demonstrates that high color contrast can improve outdoor advertising recall by 38 percent.
